WALEED ALBARAKATI

Full-Stack Software Engineer

Riyadh, Saudi Arabia • 0597055755 • albrkati9@gmail.com • linkedin.com/in/waleed-albarakati • github.com/wlem24

PROFESSIONAL SUMMARY

Full-stack software engineer transitioning from technical support and IoT development into AI-powered application development. Hands-on experience building production-style platforms with FastAPI, React, and PostgreSQL, including Retrieval-Augmented Generation (RAG), vector search, and LLM integration. Placed 3rd in a national AI hackathon (Haqooq AI) building a legal-tech RAG platform, and currently developing RFPilot, an AI-driven RFP management system. Strong foundation in troubleshooting, system integration, and client communication from 18+ months supporting IoT and telematics platforms in a live production environment.

CORE SKILLS

- Languages & Backend: Python, JavaScript, FastAPI, REST API design, JWT authentication, SQL
- Frontend: React, responsive UI, component-based architecture, HTML/CSS
- Data & AI: PostgreSQL, pgvector, ChromaDB, RAG pipelines, semantic search, LLM integration, prompt engineering
- DevOps & Tooling: Docker, CI/CD fundamentals, Git/GitHub, Agile & Scrum
- Systems & Support: IoT platforms, telematics, incident management, root cause analysis, SLA management

PROFESSIONAL EXPERIENCE

Solutions Support Specialist — SaudiEx *Jan 2025 – Jan 2026*

- Supported live IoT and telematics platforms serving enterprise clients, monitoring performance and resolving production incidents.
- Led system integration and cross-platform troubleshooting, reducing recurring issue tickets through root cause analysis.
- Acted as technical point of contact between customers and engineering teams, translating issues into actionable fixes.

IoT Developer — SaudiEx *Aug 2024 – Jan 2025*

- Developed and supported IoT solutions for a hospital-grade infant safety and tracking system (Dallah Hospital Project).
- Built and tested real-time monitoring and device-integration features, improving system reliability.
- Collaborated with cross-functional teams on debugging and performance optimization for connected devices.

KEY PROJECTS

RFPilot — AI-Powered RFP Management Platform (Ongoing, Bootcamp Graduation Project)

- Building a full-stack platform automating the RFP lifecycle: document analysis, AI-driven Bid/No-Bid recommendations, semantic search, and collaborative approval workflows.
- Stack: FastAPI, React, PostgreSQL with pgvector, RAG pipeline, JWT auth, Docker, CI/CD.

Ruya Tech — AI Legal Assistant (Haqooq AI Hackathon — 3rd Place)

- Co-built a RAG-based platform helping employees and HR teams interpret Saudi Labor Law, contracts, and leave/benefit policies in plain language.
- Implemented an AI contract-negotiation assistant to improve transparency between employees and HR departments.
- Stack: Python, FastAPI, React, PostgreSQL vector database, semantic search, LLM integration.

AI Chatbot & Web Platform

- Built a full-stack AI chatbot with FastAPI + React, REST APIs secured with JWT, and database-integrated RFP data retrieval.

CV Evaluation Web App

- Built a resume-evaluation tool in HTML/CSS/JavaScript with dynamic UI and structured scoring logic.

EDUCATION & TRAINING

Software Development Bootcamp (Python) — Saudi Digital Academy × WeCloudData *7 weeks, 2026*

- Covered backend/frontend/full-stack engineering, software architecture, Agile/Scrum, Git workflows, Docker, and CI/CD fundamentals.
- Awarded "Champion of the Week" for outstanding participation and team contribution.

Diploma, Computer Programming and Web Development — College of Communications and Information, Riyadh *Nov 2023*

CERTIFICATIONS

- AI Engineering Certificate • Cisco Ethical Hacker • Google Cybersecurity Professional Certificate
- Google IT Support Professional Certificate • IBM IT Support Professional Certificate
- Google Data Analytics Professional Certificate • Meta Front-End Developer Professional Certificate
- CompTIA A+ (Preparation) • Software Development using Python Bootcamp Certificate
